

Modules 2018

The Biblical Narrative

This unit explores God's ultimate purposes by examining the overall message of the Bible and the magnificent hope it contains. It will identify how the biblical elements fit together to make the whole, and to present this in ways that respond to the needs of any context.

The Formation of Self

This unit will help individuals understand what has formed them and how to grow spiritually. The skills developed will not only help individuals to understand their journey and map out clear pathways to achieving their desired destination, but also equip them to do that for other people and organisations.

Authentic Leadership

To lead in today's society requires a complex set of skills. This unit seeks to equip individuals with those skills, specifically the ability to cast vision, to develop effective teams, and to reflect theologically to ensure that the leadership engaged in is authentically and distinctly Christian.

Our Place in God's Narrative

This unit examines the mission of God and the place that God's people play in partnering with him in that mission. Skills will be developed that will help individuals and churches align themselves with what God is doing in their context and contribute to the global church.
